Self-locking Pop Up Display

How to mount the plastic strips and the magnetic tape to the graphic.

Apply 1" / 25mm double backed adhesive tape to top and bottom
Attach top and bottom plastic strips

Apply magnetic tape 1/16" / 1.5mm
from outer edges

Set-Up Instructions

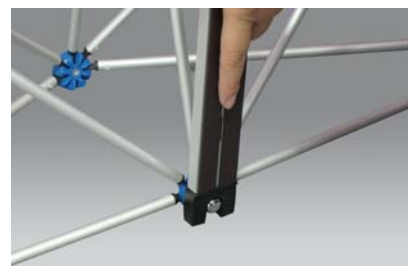

Step 1: Remove frame from the case.

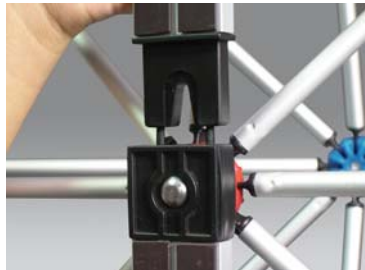

Step 2: Place frame on floor with yellow hubs facing up and toward you. Grasp frame rods and lift to expand frame.

Step 3: Frame is fully expanded.

Step 4: Remove channels from the protective bag in the case. There are total 6 sets of pre-connected channels. Connect bottom channel to hub of frame.

Step 5: Center Connection(s). Pull apart the center channel. Lock the top end of the bottom channel to the hub. Release the bungee cord and center channel is locked with the bottom channel on the hub.

Step 6: 4 Channels are applied to all quadrants on front side of frame. Extra 2 channels are applied to each end on back side of frame.

Step 7: Grasp panels on their edges making sure panel notches are on top. Hold the panel slightly concave to give it the rigidity needed to reach the top of the channel. Hook the panel notch over the pin at the top of the channel. Let panels attach to magnetic channels.

Step 8: Hook the panel notch over the pin at the top of the front channel. Let panel attach to magnet on channel. Guide end panel around to back of frame and attach in the same matter. Set Up completed.
