

EnduraCoat Aqueous Coatings

Low-VOC aqueous coatings for a more eco-friendly laminating solution.

EnduraCoat liquid laminates are low in VOC's and are specially formulated for applications such as fleet graphics; giclée prints on canvas; signs and banners or digitally printed wall coverings.

While these coatings are meant to be used with the Drytac® line of coating equipment, they can also be applied by hand with a roller, paint pad, airless sprayer or brush. Average square foot coverage is 623 square feet per gallon when applied with a Mayer rod flood coater. Manual applications will vary depending on method and other factors. A manual application guide is available on the Drytac® website at www.drytac.com. Contact your local sales representative to discuss your particular application.

All coatings are bottled in 1 gallon containers, packaged 2 gallons to a box. Four-gallon cases and 55-gallon drums are also available.

DRYTAC®

EXPERTS IN FINISHING SOLUTIONS

Name	Product Code	Description
Fine Art High Gloss	ECWBFA-HG	
Fine Art Satin	ECWBFA-S	<i>Specifically developed for canvas and giclée prints. Eliminates the micro air bubble issue commonly found in giclée coatings. For manual application or for use with the Photocoater or AFC1600, AFC2000 and AFC3200</i>
Fine Art Satin Matte	ECWBFA-SM	
Fine Art Matte	ECWBFA-M	
Sign and Banner	ECWBSBG	<i>Machine applied, economical gloss finish coating with UV inhibitors for up to 3 years outdoor durability.</i>
Giclée Cool Gloss	ECWBG2GC	Cool toned gloss finish flexible coating designed for use on inkjet canvas printed with water-based inks. Compatible with bright white canvases like Fredrix® Vivid 777. Fortified with UV absorbers and light stabilizers.
Giclée Gloss	ECWBG2G	Warm toned gloss finish flexible coating designed for use on inkjet canvas printed with water based inks. Compatible with warmer toned canvases like Fredrix® 901WR. Fortified with UV absorbers and light stabilizers.
Giclée Satin	ECWBG2S	Satin finish flexible coating designed for use on inkjet receptive canvas with water based inks. Fortified with UV absorbers and light stabilizers.
Photo Gloss	ECWBPG	High gloss finish that enhances photo and ink jet images that need scratch protection. Fortified with UV and light stabilizers.
Photo Lustre	ECWBPL	Natural E-Surface lustre finish that enhances photo and ink jet images that need scratch protection. Fortified with UV and light stabilizers.
Photo Matte	ECWBPM	Soft, non-glare, matte finish that enhances photo and ink jet images that need scratch protection. Fortified with UV and light stabilizers.
Intego Gloss	ECWBIG	Low cost gloss coating designed for mop on applications requiring limited outdoor usage. Super fast drying and virtually odor free.
Sign and Banner	ECWBSBG	Machine applied, economical gloss finish coating for short term (up to 2 years) outdoor usage.
UltraFlex Gloss	ECWBUFG	Extremely flexible, gloss finish coating for vehicle wrap applications, outdoor durable for 5 years
UltraFlex Matte	ECWBUFM	Extremely flexible, more matte finish coating for vehicle wrap applications, outdoor durable for 5 years.
UltraMaxx Gloss	ECWBUMG	Flexible, low gloss coating for vehicle wraps designed around difficult to stick to inks and substrates. Contains UV absorbers and light stabilizers. Not warranty eligible.
UltraMural	ECWBUM	Flat matte, fade resistant coating for digitally printed wall coverings. Excellent moisture and mildew resistance. Contains UV light absorbers and stabilizers.
UltraStain Resist	ECWBUSR	A high gloss, low VOC fade resistant coating for use where chemical exposure or graffiti/tagging may be an issue.
