

Interlam Biolaminates

Helping your customers feel good about their product choice.

As your customers' awareness about their eco footprint grows, so does your need to offer them products that are more environmentally friendly. Our new biodegradable pressure-sensitive laminate films, Interlam BioMatt and Interlam BioGloss will biodegrade in a normal landfill.

Biodegradable, Recyclable Biolaminating Films

Interlam BioMatt and BioGloss laminating films are biodegradable because the base film for both products is derived from wood pulp, a sustainable and biodegradable resource. These films also utilize a water-based acrylic adhesive, which is safer for the environment. Interlam Biolaminates also utilize a thin polyester release liner that reduces bulky waste that goes into landfills. Once applied to a graphic, Interlam BioMatt and BioGloss break down easily in the recycling process allowing for more eco-friendly disposal and recycling options for laminated graphics.

Interlam BioMatt™ 3mil

The film has a very nice “dead” matt non-reflective finish.

Available Sizes

IBM24164	24.5" x 164' (622mm x 50m)
IBM38164	38" x 164' (965mm x 50m)
IBM49164	49" x 164' (1244mm x 50m)

Interlam BioGloss™ 3mil

The film has an attractive gloss finish.

Available Sizes

IBG25164	25.5" x 164' (648mm x 50m)
IBG38164	38" x 164' (965mm x 50m)
IBG51164	51" x 164' (1300mm x 50m)
