

Drytac BioFab Blackout

Drytac BioFab Blackout is a biodegradable curl free wide-format printable fabric media with a textile look and feel which is similar to artist canvas. This product is mildew resistant and UV stabilized.

Printing Platforms:

Eco-solvent, solvent and UV curable

Characteristics:

- Excellent printability, especially with colors difficult for textiles, such as black.
- No glare or curling.
- Environmentally friendly.
- Withstands high preheat temperatures.
- High frequency and hot air weldable, as well as sewable
- High tenacity polyester creates a high tear and tensile strength.

Applications:

- POP up displays
- Roll up displays

Technical Data

Properties	
Thickness	.28 mil
Width	36" x 98' and 44" x 98'
Tensile Strength	Warp 230; Fill 118 (120.70 daN)
Tear Strength	Warp 18.6; Fill 22.0
Translucence	24%
Weight	9 oz./sq. yard
Mildew Resistant, UV stabilized, Flame retardant NFPA 701, M1	
Compatibility	Most large format printers : solvent, eco-solvent and UV curable inks.
Optimal Storage Conditions	-30 to 70 C; -22 to 158 F
