

Drytac® DES-3

Economical Plaque Decor Edge Finishing System

DES-3 Plaque Decor Edge Finishing System

A more economical edge finishing system for plaques and block mounts designed for customers who produce a small to medium volume of plaques. The DES-3 system consists of two separate stations that do the work of a much larger machine for a fraction of the cost.

DES-3 Edge Shaper

The user-friendly Edge Shaper applies a 45-degree beveled edge to MDF, masonite or acrylic. With an adjustable bevel height of up to 5mm, the DES-3 Shaper station also comes with a safety guard.

DES-3 Edge Foiler

The Edge Foiler applies a fresh finishing touch to your artwork by applying a standard foil tape on straight or beveled edges. Edge foils used with the DES-3 foiling system are available from Drytac in white, black, gold, and silver.
