

## THIRD PARTY CERTIFICATION

Issue Date: May 29, 2012

This is to certify that the Emerytex® facestock (PVC film) has been tested and is compliant with the following safety standards for occasional food contact.

US FDA 21 CFR 175.300

US FDA 21 CFR 177.1975

European Regulation (EU) No 321/2011

SGS International

Test Report No. 2241845/JL

The Emerytex® base laminating film is available with a variety of heat-activated and pressure-sensitive adhesives which have not been tested for FDA indirect or direct food contact compliance. For more involved, non-occasional food contact applications of Emerytex® and or applications whereby a combination with an FDA approved adhesive is required, additional and specific application testing is highly recommended.

These test results are not transferable and may not be relevant or applicable to real life applications. Therefore, Drytac® strongly recommends and other regulatory entities may require additional testing to determine the suitability for any specific end-application. Refer to Drytac® Terms and Conditions of Sale at [www.drytac.com](http://www.drytac.com) for additional liability limitations.

This certificate is the property of Drytac® Corporation. This certificate and all copies should be returned to Drytac® upon request.
