

DYNAMIC PLUS OVERLAMINATES

Dynamic Plus overlaminates are PVC base films that have a pressure sensitive acrylic adhesive.

They add depth and detail to a variety of flexible media substrates while simultaneously preventing the occurrence of silvering during lamination.

These laminating films enhance and protect graphics against dirt, dust and fingerprints to ensure maximum longevity.

FIRM BOND

- Can be applied quickly and easily
- Contain UV stabilizers that prevent film degradation and provide UV protection for indoor and outdoor use
- Dynamic Plus overlaminates are outdoor durable for 2 years

What to Laminate

- POP displays and promotional graphics
- Architectural renderings and maps
- Tradeshow graphics and event signage
- Mouse pads, placemats or counter graphics

Where to Use

High traffic indoor display areas where:

- Specific lighting conditions cannot be controlled
- Graphics will be viewed under direct lighting from different angles
- Graphics may be subject to extensive handling

Outdoor applications, including construction barricades or places where graffiti might be a possibility, such as bus shelters, train stations and kiosks

PRESSURE SENSITIVE

DURABLE

Product	Mil	Film	Finish
Gloss	4.2 (3.2/1)	PVC	Gloss
Lustre	4.2 (3.2/1)	PVC	Lustre
Matte	4.2 (3.2/1)	PVC	Matte
Sand	4.2 (3.2/1)	PVC	Sand texture
