WindowTac® is a clear, double-sided mounting adhesive that has a unique embossed release liner allows the adhesive to be easily installed with minimal effort, making WindowTac® ideal for face mounting of temporary graphics to glass, acrylic and other non-porous surfaces. Simply adhere printed images to the side with the permanent acrylic adhesive and apply the removable textured acrylic adhesive side to a clean mounting surface. With WindowTac®, there is never any need for wet application. Graphics can be dry installed, cleanly removed and easily re-positioned during installation thanks to micro grooves in the removable adhesive that allow for easy air evacuation with a squeegee. The result? Graphics with excellent clarity and no bubbles or wrinkles. WindowTac® works well for short-term promotional window advertising and POP displays, backlit display cabinets, glass cooler doors, and light boxes. The film contains UV stabilisers, which protect against UV degradation and it can be used on any materials including wide format digital technology print media.

BACKLIT DISPLAYS

Product Code: PWD

23 micron Clear PET

Product: Permanent Acrylic and Removable Acrylic

Width 1370mm

APPLICATIONS
Smooth Flat Surfaces
Retail Backlit Displays
Window Graphics
WindowTac® is a 0.9 mil (23μ) visually clear PET film, coated on one side with a pressure sensitive, removable adhesive that is protected by a micro-grooved PE release liner that imparts an embossed pattern onto the adhesive coating. The other side is coated with a pressure sensitive, aggressive permanent adhesive that is protected by a bleached Kraft release paper coated on both sides with PE and siliconised on the release side. The film contains UV stabilisers, which protect against UV degradation, and the micro-grooves in its adhesive allow for easy air evacuation.

Prior to application, clean the mounting substrate with soap and water. Rinse thoroughly with water and wipe dry with a lint free cloth. Window cleaners are not recommended.
