

Drytac Ferro™ is a lightweight magnet-receptive material with a smooth white paper finish that will readily accept magnets of all kinds when placed under graphics.

Drytac Ferro™ is available with and without pressure-sensitive mounting adhesive.

Its many applications include maps, calendars, courtroom exhibits, in/out boards, scheduling/presentation boards, changeable signage, POP/exhibit graphics, directory boards, menu boards, game boards, etc. In fact, Drytac Ferro can be used virtually anywhere a magnet-receptive surface is required. After applying your image, you may want to consider laminating your print with either Protac Scribe™ or MHL Scribe™ for a dry-erase surface. Ferro is also screen-printable.

PRODUCT STRUCTURE

Substrate	Steel
Adhesive*	Solvent/Rubber Hybrid Acrylic
Release Liner	n/a

PRODUCT CHARACTERISTICS

Substrate Thickness	2 mil (50µ)
Adhesive*	1 mil (25µ)
Coating	4 mil (100µ) white paper on each side
