

# ProTect™ Spray Booth Liner

## TECHNICAL SPECIFICATION

ProTect spray booth liner is part of the ProTect range. It consists of a 23µ white or clear polyester carrier that has a specially designed adhesive on the exposed side and a removable adhesive that adheres to the wall panels on the other. This self-wound product is protected with a white glassine paper with a differential release liner. This liner is removed after application to the wall panels. ProTect is a cost effective, non fibrous and easy to use protective coating for spray booths. The non-stretchable polyester aids removability.

- PROTECT IS SPECIFICALLY DESIGNED FOR LINING SPRAY BOOTHS TO CAPTURE OVER-SPRAY AND DUST PARTICLES.
- IT REDUCES STATIC ELECTRICITY AND THE WHITE FILM INCREASES THE LUX LEVEL.
- \*AN ADDITIONAL BENEFIT OF A CLEAR FILM ALLOWS MORE LIGHT IN WHEN APPLIED TO WINDOWS AND DOORS, IMPROVING VISIBILITY.

### PRODUCT STRUCTURE

<b>Adhesive</b>	Removable Solvent Free Acrylic (Pressure Sensitive)
<b>Film</b>	White or Clear* PET
<b>Adhesive</b>	Permanent Solvent Free Acrylic (Pressure Sensitive)
<b>Release Liner</b>	2 Side Siliconised Glassine Release Paper

### PRODUCT CHARACTERISTICS

<b>Film Thickness</b>	0.9 mil (23µ)
<b>Service Temperature Range</b>	-4°F to 176°F (-20°C to 80°C)
<b>Shelf Life</b>	1 year
<b>Storage Conditions</b>	59°F to 72°F (15°C to 22°C); 50 - 55% Relative Humidity

### DIRECTIONS FOR USE

- The surface must be clean and dust free
- The film can be applied from the box
- The material is applied vertically to the wall panel using a squeegee
- When it has been firmed down (see application sheet) the white liner is removed and another strip applied, which can be slightly overlapped onto the existing strip
- We recommend that ProTect should be removed and replaced after 3 months but this will depend upon the amount of use.
